

**In the current healthcare, social, and economic crisis triggered by the coronavirus pandemic and in a context conducive to reflection and discussion, with the creation of Spain's Post-COVID Social and Economic Reconstruction Committee, CEFI wants to share a series of insights and proposals to contribute to Spain's rebuilding.**

**Generally, based on our experience of the pandemic, CEFI believes that the future of Spain's National Healthcare System should shift toward a collaborative model involving all system agents, to a simplification of processes (reducing bureaucracy) in order to adapt to situational developments and promote digital tools, systems, and the use of available data.**

**At the same time, we believe it is necessary to maintain, and in some cases increase, support and recognition of the innovations carried out by biopharmaceutical companies and incorporate mechanisms and solutions into the system that guarantee rapid access to the market for medications and innovative solutions to cover unmet medical needs.**
